

CHARGER

AER Charger Stabilizing Reamer

PROVIDING EXPERIENCE AND EXPERTISE

Experience reaming over 1,000 RWD Jobs and over 10,000,000 feet RWD

The Charger reamer is a new generation reamer that features several design enhancements. These innovated features are designed to improve steering performance and improve durability. The tool features a wide range of cutting elements including tungsten carbide inserts and PDC cutters.

US Patent Numbers - 9,297,209, 9,316,056, 9,428,963, 9,151,119, 9,145,746 and 9,470,048

With our experience, utilizing our technical expertise and service recommendations, we have successfully enabled over 10,000,000 feet of hole to be “reamed while drilling” with over 1,000 RWD jobs to date and 98% success in subsequent packer installation! These tools offer proven performance in improving hole quality and reducing drilling costs.

- ⚡ Saving rig time by eliminating clean out runs
- ⚡ Reduce the risk of differential sticking
- ⚡ Increase rate of penetration
- ⚡ One piece construction
- ⚡ Control hole deviation
- ⚡ Ream out doglegs
- ⚡ No added torque
- ⚡ Cost effective
